

ETHACRYL™ D 20

Powder PolyCarboxylate ether for concrete admixtures

TYPICAL CHARACTERISTICS

Nature	PolyCarboxylate Ether (PCE)
Appearance	White to light brown free flowing powder
Water content	<5
pH	7 at 10% solution
Bulk density	300-650

DESCRIPTION

Thanks to its fluid powder form, Ethacryl™ D 20 is a superplasticizer for dry mortar applications. This high-performance dispersant is based on Coatex Ethacryl™ polycarboxylate polymer technology. Ethacryl™ D 20 is a key component for cementitious construction materials.

RECOMMENDED ADDITION LEVEL

0.03 to 1.00% in relation to weight of binder

STANDARD PACKAGING

Other packaging may be available upon request

- 25 Kg Bag
- Big Bag

HANDLING & STORAGE

The product should be protected from the effects of weathering and stored between 10 and 30°C. Keep the product in a dry area, close the bag after usage and use the complete bag rapidly. In these conditions, this product should be used within 6 months from delivery.

HEALTH AND ENVIRONMENTAL DATA

For safe handling please refer to the Safety Data Sheet. For more information about health and environmental data, please contact us.
