# RHEOCARB™ J 40

Highly specialized rheology modifier for InkJet coating colors

## **TYPICAL CHARACTERISTICS**

Nature Alcoxylated water soluble polymer
Appearance Colorless to yellow liquid

Solid Content (%)

pH

Brookfield viscosity (mPa.s)

Specific gravity

25

475

1.04

## **DESCRIPTION**

Rheocarb™ J 40 is a non-ionic, highly specialized rheology modifier for InkJet Coating Colors. It is specifically designed to improve water retention while maintaining an optimized state of dispersion. Rheocarb™ J 40 can be utilized to ease the mix of InkJet Coating Colors, thus shortening the transition between paper types and reducing circuit washing times & wastewater generation - leading to significant cost savings. Rheocarb™ J 40 benefits: -achieve significant cost savings during the manufacturing transition of different paper types - improved water retention -improved coating runnability at maximum solids -enhanced paper printability

## RECOMMENDED ADDITION LEVEL

0.5 to 1.5 parts d/d

## STANDARD PACKAGING

Other packaging may be available upon request

- 1000L IBC
- Bulk

# **HANDLING & STORAGE**

The product should be protected from the effects of weathering and stored between 5 and 40°C. Once opened, packaging should be resealed immediately after use.

In these conditions, this product should be used within 6 months from delivery.

# **PROCESSING INSTRUCTIONS**

Compatible with various pigments & fillers used in InkJet coating applications cationic or anionic additives.

## **HEALTH AND ENVIRONMENTAL DATA**

For safe handling please refer to the Safety Data Sheet. For more information about health and environmental data, please contact us.

## **MARKET**

## **Pulp & Paper**

- Board CoatingBoard Coating
- Paper Coating
- Paper Coating

## **KEY BENEFITS**

- Precoat
- Topcoat
- Anti-clogging
- Water retention
